Topic Queries

Query for title:

Query for description:

Search in "Title" AND "Description"

2 fields in old version

5 fields NOW !

Title	<input type="text" value="solar OR pv OR photovoltaic OR photovoltaics"/>	<input checked="" type="checkbox"/> Must match
Description	<input type="text" value="solar"/>	<input type="checkbox"/> Must match
Content	<input type="text" value="solar OR pv OR photovoltaic OR photovoltaics"/>	<input checked="" type="checkbox"/> Must match
Attachment	<input type="text" value="Search in attachment"/>	<input type="checkbox"/> Must match
Image Metadata	<input type="text" value="Search in image metadata"/>	<input type="checkbox"/> Must match

[← Use simple search](#) [Clear fields](#) [Submit search](#)

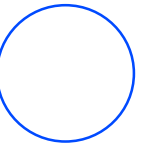

More advanced queries in WATCH mode

CUMULATIVE use of previously reserved filters in SEARCH-EXPLORE mode

Including geolocation filter

The screenshot displays a search interface with a search bar at the top containing the query "PV Power Plants (energy)". Below the search bar, there are several filter categories: "ITEMS", "ENTITIES", "KEYWORDS", and "PERSONS". The "ENTITIES" filter is highlighted with an orange box and contains a list of terms: "AB", "ABIGAIL", "ABU DHABI", and "ABB". The search results are displayed in a grid format, showing several articles related to solar energy, including "Cabinet approves second tranche of PLI Scheme for solar...", "KiloVault Announces Upgrade Improvements to it...", "Community Solar Power Summit 2023 Announcement!", and "Amazon announces 420 MW of utility-scale solar project...". The interface also includes a search bar, a search button, and a search history dropdown.

Navigating from one search to another in EXPLORE mode

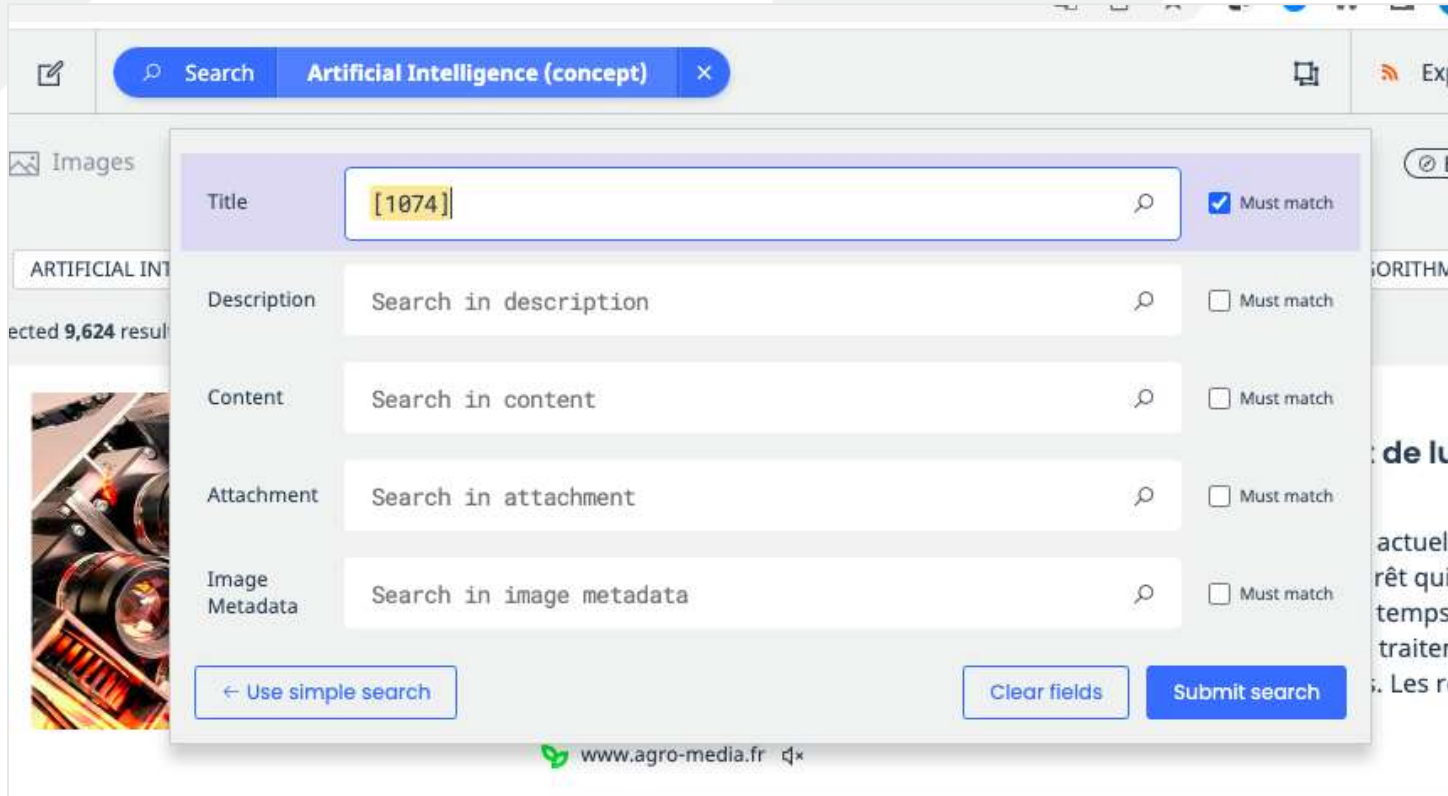

The screenshot displays the EXPLORE mode interface. At the top, the search bar contains "Crime Ukraine (geoloc)" and the mode is set to "Exploring". The left sidebar shows a list of filters and sources, with "Crime Ukraine (geoloc)" selected. The main area features a map of Europe with a heatmap overlay, indicating the geographic distribution of the search results. The heatmap shows a concentration of results in Ukraine, with a red dot in the center and a yellow outline around the country. The map also displays various cities and countries, including Moscow, Hamburg, Istanbul, and Tehran. The interface includes a top navigation bar with icons for search, filters, and other functions, and a bottom navigation bar with icons for home, search, and other actions.

TOTAL sourcing flexibility

- **Be able to work on part of all Cikisi sources using new filters** (country, type, domain name)
 - Formerly this possibility required the selection of a Category
- **Be able to call upon different sets of data** (sources) within the same theme depending on the search
 - Query « Coca-Cola » in category « News »
 - Query « Sprite » in source type « Twitter »

More advanced queries in SEARCH mode

- Simple Search Bar
- Advanced Search form – including concept usage

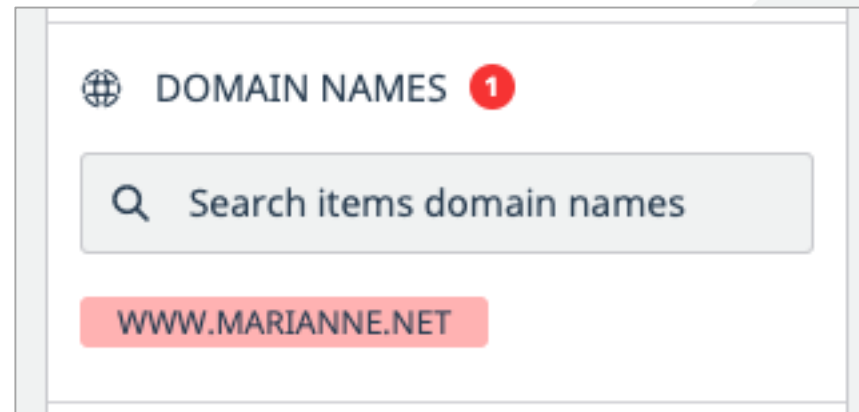

The screenshot displays a search interface on the website www.agro-media.fr. The search bar at the top contains the text "Artificial Intelligence (concept)". Below it, an advanced search form is open, allowing for more specific queries. The form includes the following fields and options:

Field	Search Text	Must match
Title	[1074]	<input checked="" type="checkbox"/>
Description	Search in description	<input type="checkbox"/>
Content	Search in content	<input type="checkbox"/>
Attachment	Search in attachment	<input type="checkbox"/>
Image Metadata	Search in image metadata	<input type="checkbox"/>

At the bottom of the advanced search form, there are three buttons: "← Use simple search", "Clear fields", and "Submit search". The background shows a search result for "Artificial Intelligence" with 9,624 results and a thumbnail image of a mechanical part.

Other benefits...

- Ability to **save searches in collections and therefore structure it**
- « MUTE » -> On item domain name
 - More accurate in case of « news aggregator »

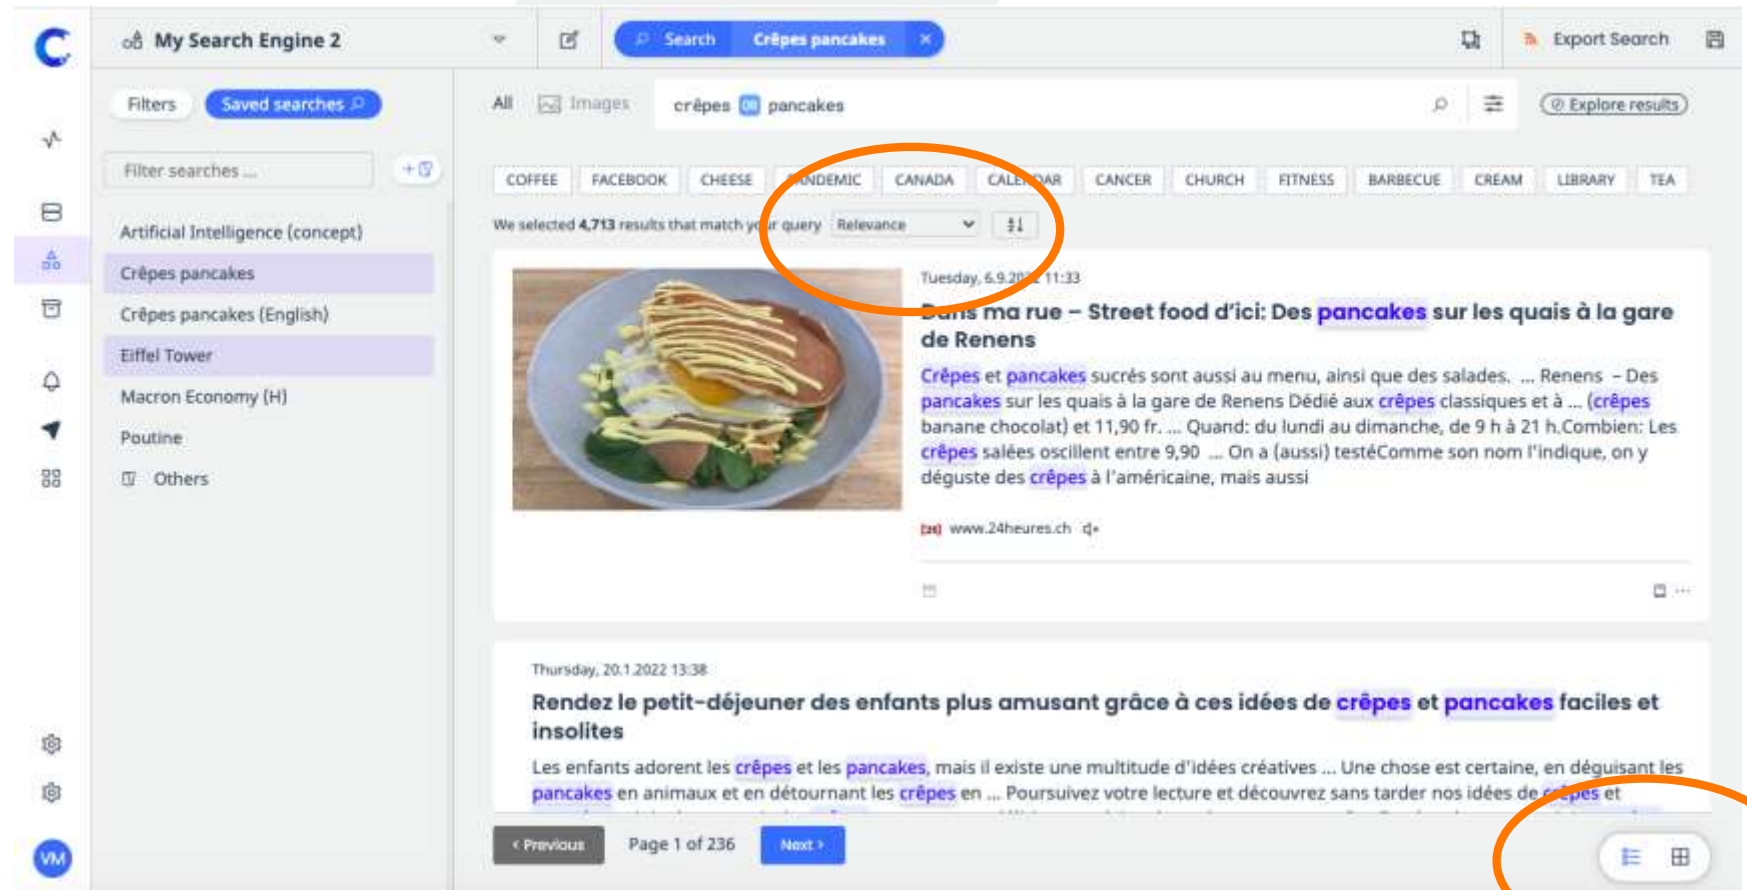

Saving User Preferences

Per THEME and per USER, we now save preferences

Already saved:

- Sort by...
- View Mode (magazine view, GRID view)

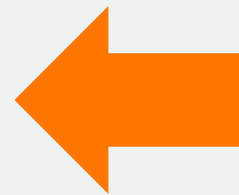

Coming soon... (novembre 2022)

New Filters :

- Item Indexation date
- Sources IDs
- Sources Owner (All – Client – Mine)

Explore new data:

- Indexation date
- Sources IDs
- **Items domain names**
- Items collections

Useful to discover top sources

New View modes : Picture / List

Info : Name changes

Before end of 2022 :

Main Menu:

- Theme > **Search Engine**
- Collection > **Knowledge Base**

New elements:

- New Theme > new **Search Engine Window**
 - New Collection > new **Knowledge Topic**
-
